- New Construction Phase Inspection
- 11 Month Warranty Inspection
- Investor Inspection
- Manufactured Home Inspection
- NACA Inspection
- Multi-family Inspection
- Commercial Inspection
- Indoor Air Quality/Mold Sampling
- Radon Testing

PROBLEM

SOLUTION

We are certified and experienced in performing a wide variety of inspection and specialty services.

PROBLEMS

01. Inspectors are deal killers
02. It's nearly impossible to reach them afterward
03. They don't stand behind their work

These are things we hear from realtors as far as some of their negative experiences with other home inspectors.

SOLUTIONS

Inspectors properly explain issues in a factual and objective way

Office staff available 7 days a week to answer questions

We always stand behind our work to ensure complete satisfaction

1. Our inspectors are trained to provide information in a way that does not sway the client one way or another; we are just there to report on our findings.
2. Even on Sunday we have office staff that are available to schedule inspections and answer questions.
3. We own up to our mistakes and ensure every client is satisfied with the service we provide.

1. Real Estate Dashboard - An app you can add to your phone that gives you the ability to schedule inspections without having to call in, and it allows you to view inspection reports of all previous inspections we have done for your clients.
2. Porch Home Assistant Gold - clients get a personal home assistant who can help them with utility services, moving coordination, and handyman services.
3. Online CE's - we provide free online CE courses through the International Association of Certified Home Inspectors.
4. Family Business Treatment - although we are a growing company, we remain family owned and operated and provide that level of service to all clients and referral partners.

Q and A

What are your prices?

Starts at \$299 and from there depends on multiple factors. Call our office or go on our website.
